

8 Ways to make code club fun

A Fiero Code Guide

01

BACKGROUND MUSIC

A little music just helps the kids know they can be loud during code club

02

SPONTANEOUS SHOW & TELLS

"Hey, who likes Pokemon? Who wants to see an awesome Pokemon game." A bunch of kids will wander over to take a look.

03

ENDING SHOW & TELL

Dedicate the last 15 minutes of code club to a dedicated "Show and Tell" time where students can stand up, plug their computer into a tv or projector, and show what they're working on.

04

CODER OF THE WEEK

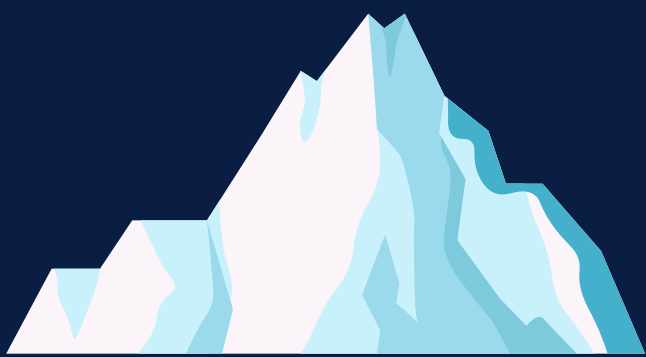

Every week pick one coder who gets to plug their computer into a TV or projector and code all day on the big screen.

05

ICE BREAKERS

Start code clubs with an Ice Breaker question or activity. Fiero has a shared Google Doc that has questions and activities from code club facilitators from around the world.

06

PAIR UP!

Encourage students to pair up and work on a project (Mission) together.

07

CONTESTS

Participate in a Fiero contest or run your own!

08

PEER REVIEWS

Do "Peer Reviews" where students review each other's projects and provide suggestions for making it better.
